Security Council
Seventy-eighth year

Children and armed conflict

Report of the Secretary-General

I. Introduction

1. The present report, prepared following consultations and covering the period from January to December 2022, is submitted pursuant to Security Council resolution [2427 \(2018\)](#). The report includes trends regarding the impact of armed conflict on children and information on violations committed, as requested by the Council in its resolution [1612 \(2005\)](#) and subsequent resolutions.¹ Where possible, violations are attributed to parties to conflict and the annexes to the present report include a list of parties engaging in violations against children, namely the recruitment and use of children, the killing and maiming of children, rape and other forms of sexual violence perpetrated against children, attacks on schools, hospitals and protected persons in relation to schools and/or hospitals,² and the abduction of children.

2. The information contained in the present report was vetted for accuracy by the United Nations. Where information is not verified, it is qualified as such. Where incidents were committed earlier but verified only in 2022, that information is qualified as relating to an incident that was verified at a later date. The information does not represent the full scale of violations against children, but provides United Nations-verified trends in grave violations against children, given that access for

² For the purposes of the present report, the phrase “protected persons in relation to schools and/or hospitals”, used in Security Council resolutions [1998 \(2011\)](#), [2143 \(2014\)](#) and [2147 \(2018\)](#), as well as in the statements by the President of the Security Council of 17 June 2013 ([S/PRST/2013/8](#)) and 31 October 2017 ([S/PRST/2017/21](#)), refers to teachers, doctors, other educational personnel, students and patients.

monitors remains a challenge. The report presents trends and patterns of violations, and engagement with parties responsible for violations that might lead to behavioural change, including promotion of accountability and compliance with child protection provisions in peace processes. In the report, it is noted that attacks or threats of attacks against community and civic leaders, on human rights defenders and on monitors of violations against children are a cause for concern and a strain on the monitoring capacity.

3. Pursuant to Security Council resolution 1612 (2005), my Special Representative for Children and Armed Conflict adopted a pragmatic approach to promote broad and effective protection for children. Reference to a situation is not a legal determination, and reference to a non-State actor does not affect its legal status. Accordingly, the report documents situations in which apparent violations of international norms and standards are of such gravity as to warrant international concern, given their impact on children. My Special Representative brings these situations to the attention of Governments, which bear the primary responsibility for protecting children, in order to encourage them to take remedial measures. Where measures undertaken by listed parties had a positive impact on children or where ongoing conduct is of concern, this is highlighted. On the basis of enhanced engagement with parties, the annexes distinguish between listed parties that have put in place measures aimed at improving the protection of children during the reporting period and those that have not.

II. Situation of children and armed conflict

A. Overview of trends and patterns

4. In 2022, children continued to be disproportionately affected by armed conflict, and the number of children verified as affected by grave violations increased compared with 2021. The United Nations verified 27,180 grave violations, of which 24,300 were committed in 2022 and 2,880 were committed earlier but verified only in 2022. Violations affected 18,890 children (13,469 boys, 4,638 girls, 783 sex unknown) in 24 situations and one regional monitoring arrangement. The highest numbers of violations were the killing (2,985) and maiming (5,655) of 8,631 children, followed by the recruitment and use of 7,622 children and the abduction of 3,985 children. Children were detained for actual or alleged association with armed groups (2,496), including those designated as terrorist groups by the United Nations, or for national security reasons.

5. My Special Representative and the United Nations made progress in engaging with parties to protect children in Burkina Faso, the Central African Republic, Colombia, the Democratic Republic of the Congo, Iraq, Israel and the State of Palestine, Nigeria, the Syrian Arab Republic and Yemen. Engagement with parties to conflict resulted in positive changes for children. More than 12,460 children formerly associated with armed forces or groups received protection or reintegration support during 2022.

6. Multidimensional conflicts, including across regions, chronic crises and new armed actors have had an adverse impact on children's lives. Hostilities spreading into new areas contributed to an increase in grave violations of 140 per cent in Myanmar. The splintering of armed groups and intercommunal violence affected children, contributing to a 135 per cent increase in grave violations in South Sudan. An upsurge in the activity of armed groups, including those designated by the United Nations as terrorist groups, caused severe deterioration of the situation in the central Sahel, in particular in Burkina Faso, leading to an 85 per cent increase in grave violations. Grave violations also increased in Colombia, Israel and the State of

Palestine, Lebanon, Libya, Mali, Nigeria, the Sudan and the Syrian Arab Republic. In contrast, Afghanistan, the Central African Republic and the Philippines saw a decrease in grave violations. The signing of the truce in Yemen contributed to a 40 per cent decrease in violations, underlining the importance of peace in achieving security for children.

7. The highest numbers of grave violations were verified in the Democratic Republic of the Congo, Israel and the State of Palestine, Somalia, the Syrian Arab Republic, Ukraine, Afghanistan and Yemen. The monitoring and verification of grave violations remained extremely challenging, including owing to access constraints, leading to the underreporting of such violations and an increase in violations verified in 2022. Verified cases of conflict-related sexual violence perpetrated against children (1,165 children) decreased by 12 per cent, but such violence continued to be vastly underreported owing to stigmatization, fear of reprisals, harmful social norms, the absence or lack of access to services, impunity and safety concerns, as also reported in my report on conflict-related sexual violence (S/2023/413).

8. The denial of humanitarian access³ remained very high, with 3,931 verified incidents. The situation is expected to worsen with the adoption of restrictive laws, decrees and regulations increasing control over humanitarian work and workers, notably in Afghanistan, Myanmar and parts of Yemen. Verified incidents of recruitment and use increased by 21 per cent, abductions by 15 per cent and killing and by maiming 5 per cent. The use of live ammunition against children and the excessive use of force increased, in particular in Israel and the State of Palestine and Myanmar.

9. There was a 112 per cent increase in attacks on schools (1,163) and hospitals (647), in particular in Ukraine, Burkina Faso, Israel and the State of Palestine, Myanmar, Mali and Afghanistan.

10. While non-State armed groups were responsible for 50 per cent of grave violations, government forces were the main perpetrator of the killing and maiming of children, attacks on schools and hospitals, and the denial of humanitarian access.

11. Gender norms shaped the exposure of children to grave violations. Boys continued to be more affected by recruitment and use, killing and maiming, and abduction, while girls were disproportionately affected by conflict-related sexual violence. While the verified number of girls facing grave violations decreased, it increased for boys. Gender, age and disability were among the many factors shaping the vulnerability of children to grave violations.

B. Challenges and the way forward

12. Blatant and systematic disregard for international humanitarian law and international human rights law continues to severely affect the protection of children. Among factors having the most severe impact was the use of explosive weapons, including those with a wide impact area, notably in populated areas, such as Gaza, the Syrian Arab Republic, Ukraine and Yemen, which led to greater child casualties and damaged schools and hospitals, depriving children of education and health services. The use of explosive ordnance, including explosive remnants of war, improvised explosive devices and landmines, represented some 26 per cent of the methods used in the killing and maiming of children. Mine action operations are

³ Information related to the denial of humanitarian access to children is presented pursuant to Security Council resolution 1612 (2005) and follows guidelines of the monitoring and reporting mechanism on children and armed conflict. The information presented herein does not reflect the full humanitarian access situation in the countries concerned.

challenged and disrupted by insecurity and restrictions on movement and access. Ensuring safety, security and access for mine action operations, child-sensitive explosive ordnance risk education and victim assistance must be prioritized, in particular in Afghanistan, Iraq, Myanmar, Somalia, South Sudan, the Sudan, the Syrian Arab Republic and Yemen. In addition, children with disabilities are more vulnerable at the time of armed conflict and are likely to face stigma and discrimination and to lack access to basic services.

13. The adoption of protocols for the handover of children associated with armed groups to civilian protection actors is a critical tool to standardize operating procedures and strengthen coordination between military and civilian actors. Subsequently, children can gain access to adequate age- and gender-sensitive and survivor-centred reintegration and assistance programmes. Handover protocols were adopted in Burkina Faso, Nigeria and the Philippines. Support must continue to fund reintegration programmes for children separated from armed groups, notably in Cameroon, the Central African Republic, the Democratic Republic of the Congo, South Sudan, the Sudan and Yemen. Progress was also made by countries concerned in the repatriation of children to countries of origin, notably from the Syrian Arab Republic, in line with the principle of non-refoulement and with respect for family unity and the best interests of the child.

III. Information on grave violations

A. Situations on the agenda of the Security Council

Afghanistan

14. The United Nations verified 1,797 grave violations against 970 children (783 boys, 187 girls) and 14 children who were victims of multiple violations. In addition, the United Nations verified in 2022 the recruitment and use of 494 boys by the Taliban that had occurred in previous years.

15. The recruitment and use of 54 children (53 boys, 1 girl) by the Taliban (38), the National Resistance Front (15) and unidentified perpetrators (1) were verified. Children were used in combat (32) and support roles (22).

Casualties resulted mainly from explosive ordnance (718) and targeted killings (26).

18. Sexual violence perpetrated against 13 children (2 boys, 11 girls) by the Taliban (7), unidentified perpetrators (5) and former pro-government militia (1) were verified in the central (11), northern (1) and southern (1) regions. ⁴ *Bacha bazi* is a harmful practice whereby boys are used by men for entertainment. The boys are made to dance at parties and are often dressed in female clothes and subjected to sexual violence.

Most attacks involved violence against protected persons, including killing (79), and damage to facilities (41).

20. The military use of 54 schools and 3 hospitals by the Taliban was verified.

21. The abduction of 8 children (7 boys, 1 girl) by the Taliban (3) and unidentified perpetrators (5) was verified. Most children were abducted for the purposes of sexual violence (5).

22. A total of 718 incidents of denial of humanitarian access by the Taliban (706), unidentified perpetrators (11) and ISIL-KP (1) were verified.

Developments and concerns

23. I note the adoption by the Taliban of a code of practice preventing the recruitment and use of boys without signs of puberty, and the demobilization of approximately 141 children. However, I reiterate my call upon the Taliban to define a child as every human being below the age of 18 years, and to respect the Optional Protocol to the Convention on the Rights of the Child on the involvement of children in armed conflict.

24. I condemn all grave violations committed by all parties to the conflict. I am concerned by the number of children killed and maimed, including by explosive ordnance, and by attacks on and the military use of schools and hospitals. I call upon the international community to support explosive ordnance clearance and risk education. I appeal to all parties to the conflict to end and prevent grave violations against children and comply with their obligations under international humanitarian law and international human rights law.

25. I am concerned by the increasing restrictions on humanitarian access and call upon the Taliban, and all parties, to allow and facilitate safe, timely and unimpeded humanitarian access to children. I urge the Taliban to revoke their decision to ban women from working for international and national non-governmental organizations and the United Nations.

Central African Republic

Developments and concerns

35. I welcome the adoption in April by the Government of a national plan to counter trafficking in children, with a focus on preventing the use of children by the Armed Forces of the Central African Republic, and a circular prohibiting the presence of children around Armed Forces of the Central African Republic and United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic military bases. I also welcome Government efforts, in cooperation with the United Nations, to develop a national prevention strategy on grave violations against children, and I call upon the Government to prioritize its finalization and adoption. However, I remain concerned by the number of grave violations attributed to the Armed Forces of the Central African Republic and other security personnel, notably recruitment and use and sexual violence. I call upon the Government to establish an interministerial committee to address grave violations, appoint child protection focal points in the Armed Forces of the Central African Republic and issue command directives applicable to all forces, including other security personnel. I urge the Government to investigate grave violations and hold perpetrators accountable and to finalize and adopt a protocol for the handover of children associated with armed groups to civilian protection actors.

36. I welcome the adoption by CPC in June of a command directive prohibiting grave violations against children, yet I remain concerned by the scale of violations attributed to the group. I urge CPC to implement the command directive and further urge FPRC, MPC and UPC, all of which have signed action plans with the United Nations, to implement their commitments. I call upon all parties to adopt concrete measures to cease all grave violations, unconditionally release associated children and protect schools and hospitals from attacks.

37. I welcome the dialogue between LRA-Achaye and the United Nations on the release of abducted children, and I urge LRA to immediately and unconditionally release all abductees and end and prevent other violations against children.

38. I urge all parties to end and prevent sexual violence against children. I call upon the Government, with United Nations support, to ensure that adequate programmes are accessible to all survivors, including child-friendly and safe reporting and response mechanisms.

39. I welcome the efforts of the Government, with the support of the United Nations and partners, to reintegrate 1,375 children affected by conflict and the establishment of a vocational training centre in Ouaka Prefecture for conflict-affected children. I encourage the authorities to continue to ensure the effective and gender-sensitive reintegration of all children released, and urge donors to fund reintegration and vocational training.

Colombia

40. The United Nations verified 290 grave violations against 209 children (122 boys, 83 girls, 4 sex unknown), including 12 Venezuelan and 4 Ecuadorian children, and 44 children who were victims of multiple violations. In addition, the United Nations verified in 2022 four grave violations that had occurred in previous years.

41. The United Nations verified the recruitment and use of 130 children (77 boys, 53 girls), between the ages of 11 and 17. Fifty children were used in a combat role. Most of the children were released (100), while 18 were killed and 12 remain associated. The United Nations verified in 2022 the recruitment and use of 4 children that had occurred in previous years (2 boys, 2 girls) by ELN (3) and Los Caparrapos (1). According to the Colombian Family Welfare Institute, 220 children formerly associated with armed groups entered its protection programme.

46. A total of 23 children (18 boys, 5 girls), between the ages of 12 and 17, were abducted by FARC-EP dissident groups (11), ELN (5), AGC (4) and unidentified perpetrators (3), and in the Bolivarian Republic of Venezuela, in areas at the border with Colombia (2), mostly for recruitment and use purposes. A total of 3 children were killed, 15 escaped or were released and the status of 5 is unknown.

47. A total of 10 incidents of denial of humanitarian access were attributed to AGC (5), unidentified perpetrators (3) and ELN (2).

Developments and concerns

48. I commend the Government for the progress made in preventing and responding to grave violations against children and for the suspension in August 2022 of air strikes against armed groups' camps where children may be present. I encourage the strengthening of programmes that prevent grave violations against children, in particular programmes benefiting Indigenous and Afro-Colombian children. I call upon the Government to avoid the organization of civilian-military activities involving children.

49. I welcome the continued progress made by the Special Jurisdiction for Peace in case No. 07 on the recruitment and use of children, as well as the Truth Commission's recommendations and its special focus on children in its June 2022 report. I also welcome the endorsement by the Government of the Safe Schools Declaration in November and urge its swift implementation.

50. During her visit to Bogotá in December 2022, my Special Representative highlighted the inclusion of child rights in the Government's total peace policy agenda and offered United Nations expertise in prevention initiatives.

51. I am encouraged by the resumption of negotiations between the Government and ELN, which provides opportunities for the protection of children. I urge the parties to include child protection priorities from the beginning of this dialogue and any other future negotiations.

52. I am concerned by the continued increase in grave violations, notably the recruitment and use and the killing and maiming of children, by armed groups, in particular FARC-EP dissident groups. I am also concerned by the increase in the number of girls and Indigenous and Afro-Colombian children who are victims of grave violations. I urge armed groups to immediately end violations, unconditionally release children and adopt concrete time-bound commitments to ending and preventing grave violations. I reiterate my call upon all parties to take all necessary measures to protect children.

53. I am concerned by the increase in sexual violence against girls, including while associated with armed groups. I urge all parties to end and prevent sexual violence. I call upon the Government to ensure that adequate and child-friendly programmes are accessible to all survivors and to swiftly bring perpetrators to justice.

Developments and concerns

64. I welcome the commitment of the Government to implementing the 2012 action plan and urge the Government to prioritize the implementation of its action plan related to sexual violence against children.

65. I commend the cooperation between the Government and the United Nations on screening, age verification and separation of children from the Armed Forces of the Democratic Republic of the Congo recruitment process. It is necessary to implement age verification at an early stage across the country and to ensure that directives on age verification and legal enrolment conditions are followed.

66. I welcome the adoption of a national strategy for a disarmament, demobilization and community recovery and stabilization programme and reiterate the need to prioritize children, especially through the provincial operational plans. I call upon donors to support reintegration programmes for children separated from armed groups.

67. I welcome the Government's ongoing efforts to hold perpetrators of grave violations accountable, and I urge them to continue to do so, including for crimes of sexual violence.

68. I welcome the signature of the unilateral commitments to protect children by Mai-Mai Machine and the release of 272 children by armed groups following United Nations advocacy.

69. I remain deeply troubled by the devastatingly high number of grave violations against children, in particular by armed groups, and the increase in killing and maiming, abductions and attacks on schools and hospitals. I am deeply concerned about the deterioration of the security situation, in particular in North Kivu and Ituri, including owing to the resurgence of M23, and the resulting access restrictions on the United Nations to monitor violations.

80. I am gravely concerned by the recruitment and use of children by HPG/PKK. I urge HPG/PKK to end the recruitment and use of children and to release all children from its ranks.

81. I am concerned that explosive ordnance is the leading cause of child casualties. I urge the Government to fully implement international conventions on landmines and explosive remnants of war to which it is a party. I call upon the Government to continue the clearance of areas contaminated by explosive hazards, explosive ordnance risk education, including prior to any movement by internally displaced persons to contaminated areas, and to prioritize victim assistance.

82. I note the release of 230 children detained on national security-related charges, but I remain concerned by the continued detention of children, including on national security-related charges, including for their actual or alleged association with Da'esh. I reiterate that the children should be treated primarily as victims and in line with international juvenile justice standards. Children should only be detained as a last resort and for the shortest period of time. I call upon the Government to release the children to child protection actors.

83. I commend the Government for the repatriation of 1,448 Iraqi children from the north-eastern Syrian Arab Republic. I reiterate my call upon all countries concerned to facilitate the voluntary repatriation and reintegration of children, in line with the principle of non-refoulement, with respect for family unity and the best interests of the child, and in accordance with international law.

Developments and concerns

93. I welcome the collaboration and constructive engagement extended by Israeli and Palestinian parties to my Special Representative, including during her visit to Israel and the State of Palestine in December 2022, as was requested in my previous report ([A/76/871-S/2022/493](#), paras. 302 and 303).

94. I welcome the exchange of letters with Israel, the appointment of a focal point and the identification of practical measures, including those proposed by the United Nations to end and prevent grave violations against children, including those related to the killing and maiming of children, accountability, denial of humanitarian access and attacks on and interference with health care and education.

95. I welcome the letters received from Palestinian Islamic Jihad and from Hamas, the appointment of focal points and the identification of practical measures, including those proposed by the United Nations to end and prevent grave violations against children, including those related to the killing and maiming and the recruitment and use of children.

96. I reiterate my call upon all parties to end and prevent any more violations against children and to adopt road maps to implement clear and time-bound commitments. I reiterate my call upon all parties to deepen their engagement with my Special Representative and the United Nations, especially the United Nations working group on the ground, on a regular basis. I request that my Special Representative coordinate with the United Nations the strengthening and broadening of that working group to cover Israel and the occupied Palestinian territory.

97. I am extremely alarmed by the continuing high level of grave violations against children, in particular the increasing level of violence in the occupied West Bank, including East Jerusalem, and I urge all parties to abide by their obligations under international humanitarian law and international human rights law.

98. I note a meaningful decrease in the number of children killed by Israeli forces, including by air strikes, as compared with my previous report. Nevertheless, I remain deeply concerned by the number of children killed and maimed by Israeli forces during hostilities and through the use of live ammunition during law enforcement operations, and by the persistent lack of accountability for these violations. I express deep concern regarding the excessive use of force and reiterate that security forces must exercise maximum restraint and use lethal force only when it is strictly unavoidable in order to protect life and put in place preventive and protective measures to end and prevent any excessive use of force against children. I note the existing procedures, and I urge Israel to immediately implement the practical measures discussed with my Special Representative to prevent any excessive use of force, including during law enforcement operations. I also call upon Israel to abide by its obligations under international humanitarian law and to ensure that civilians, including children, are not targeted during hostilities and that all necessary precautions are taken to protect them. I further urge Israel to pursue accountability for violations against children and to continue to investigate each case where live ammunition was used. I exhort Israel to better protect schools and hospitals, including medical personnel and ambulances. I further call upon Israel to ensure Palestinian children's access to essential health care, including by promptly granting travel permits, and I welcome the willingness of Israel to continue to engage with the United Nations on concrete measure to facilitate the issuance of permits.

99. I am deeply concerned by the continuing increase in the number of children detained by Israel and by the reports by children of physical violence directed against them during detention. I reiterate my call upon Israel to uphold international juvenile justice standards, including the use of detention as a last resort and for the shortest period of time, to end the administrative detention of children, and to prevent any violence and ill-treatment in detention.

100. I am deeply concerned by the increase in the killing and maiming of children by Palestinian Islamic Jihad's Al-Quds Brigades. I call upon all Palestinian armed groups to cease indiscriminate launching of rockets and mortars from densely populated areas in Gaza towards Israeli civilian population centres. I urge all Palestinian armed groups to protect children, including by preventing them from being exposed to the risk of violence and by abstaining from instrumentalizing them for political purposes. I reiterate my call upon armed groups to end and prevent the recruitment and use of children and to abide by their domestic and international legal obligations. I exhort Palestinian armed groups to better protect schools.

Developments and concerns

215. I welcome the continued commitment of the Government to implementing the 2014 action plan and the 2018 road map to end and prevent child recruitment and use. I further welcome the establishment of child protection units in all military regions, and the conduct of field visits to disseminate directives banning child recruitment and verify the absence of children from military ranks. I note the significant decrease in the number of verified cases of children recruited and used and killed and maimed by the Yemen Armed Forces, and efforts by the Government to facilitate humanitarian access. I encourage the Government to continue to strengthen existing measures to prevent child casualties during military operations and to prevent violations. I call

upon the Government to adopt a handover protocol on the release of children detained during military operations. I further welcome the commitment from the Security Belt Forces to abide by the existing action plan and the first training of its forces on the six grave violations that took place in March 2023.

216. I welcome the continued engagement of the Coalition with my Special Representative to sustainably end and prevent grave violations against children, and the progress achieved in the implementation of the programme of time-bound activities endorsed in January 2020. I note the continued and significant decrease in the number of child casualties, and I call upon the Coalition to pursue the implementation of the 2019 memorandum of understanding and the related programme of time-bound activities. I urge the Coalition to expedite justice, accountability and redress to children who are victims and their families. Continuous monitoring and engagement to ensure the sustained implementation of agreed activities and further reductions in the number of affected children, as verified by the United Nations, are expected and will be closely observed.

217. I welcome the progress made by the Houthis in the implementation of the 2022 action plan, and the significant decrease in violations in 2022. In particular, I welcome the appointment of the technical committee and of senior focal points, and the endorsement of standard operating procedures to end and prevent the recruitment and use of children. I urge the Houthis to continue to fully implement the action plan, including by releasing all children, and to end and prevent violations. I call upon the Houthis to continue to implement the 2020 handover protocol and to allow the unimpeded access of the United Nations to all places of detention.

218. I am encouraged by the decreasing number of grave violations, especially of children recruited and used and killed and maimed, in particular during the United Nations-brokered nationwide truce between the Government of Yemen and the Houthis that was in place from April to October 2022. I urge parties to renew and expand the truce and to engage with my Special Envoy for Yemen towards the resumption of an inclusive political process to reach a comprehensive negotiated settlement, and to include child protection concerns in this process.

219. I remain concerned by the prevalence of killing and maiming of children, including by landmines and explosive ordnance. I urge all parties to urgently facilitate explosive ordnance clearance and explosive ordnance risk education.

220. I remain concerned about the continued high number of humanitarian access constraints, and I urge all parties to facilitate safe, timely and unimpeded humanitarian access.

Most attacks involved the use of explosive weapons with wide area effects. Incidents involved damage (577), destruction (151), looting (17) and threats (6). Among those attacks, 20 resulted in child casualties.

317. The United Nations verified the military use of 23 schools and 7 hospitals by Russian armed forces and affiliated armed groups (24), Ukrainian armed forces (4) and unidentified perpetrators (2).

One child was abducted and taken to Belarus and another child was used as a hostage in exchange for civilians and prisoners of war. All 92 children were released. In addition, the United Nations verified the transfer of 46 children to the Russian Federation from areas of Ukraine that, in part, are or have been under the temporary military control of the Russian Federation, including children forcibly separated from parents, children removed from schools and institutions without the consent of guardians, and a child who was given Russian citizenship.

319. The United Nations verified 10 incidents of the denial of humanitarian access attributed to Russian armed forces. Incidents involved the denial of access to cross the front line to deliver humanitarian assistance (8) and attacks on aid distribution points (2).

⁷ Ukrainian armed forces include affiliated Ukrainian militias and combatants.

⁸ Affiliated armed groups include pro-Russian militias and combatants.

Developments and concerns

320 I welcome the engagement of the Government of Ukraine with my Special Representative to end and prevent grave violations against children, following the request in my previous report (A/76/871-S/2022/493, para. 313), including through a visit by my Special Representative on 11 and 12 May 2023. I welcome the practical measures that have been established, including explosive ordnance risk education, the appointment of a national focal point on children and armed conflict and the establishment of an interministerial committee on children and armed conflict. I further welcome the engagement of the Government with the United Nations to develop a joint prevention plan.

321. I am concerned by the number of grave violations against children by Ukrainian armed forces presented in my report, which does not represent the full scale of incidents. I am particularly disturbed by the high number of children killed and maimed and by the attacks on schools and hospitals. I urge Ukrainian armed forces to abide by their obligations under international humanitarian law and international human rights law, as set out in paragraph 341 of the present report.

322. I welcome the engagement of the Government of the Russian Federation with my Special Representative to end and prevent grave violations against children following the request in my previous report (A/76/871-S/2022/493, para. 313), including through a visit by my Special Representative on 18 and 19 May 2023. I welcome the practical measures that have been established and I urge the Russian Federation to quickly adopt all measures discussed with my Special Representative, as set out in paragraph 340 of the present report.

323. I am appalled by the high number of grave violations against children in Ukraine following the invasion of Ukraine by the Russian Federation, as presented in my report, which does not represent the full scale of incidents, as verification depends on many factors, including access, and many are still under verification. I am particularly shocked by the high number of attacks on schools and hospitals and protected personnel and by the high number of children killed and maimed attributed to the Russian forces and affiliated armed groups. I am also disturbed by the reports of abduction, recruitment and use, sexual violence against children and military use schools and hospitals. I urge Russian armed forces and affiliated armed groups to abide by their obligations under international humanitarian law and international human rights law, and to immediately implement measures to protect children and to prevent attacks on schools and hospitals and their military use. I urge Russian armed forces and affiliated armed groups to urgently adopt measures to end and prevent these grave violations, and to pursue accountability.

324. It is imperative that, all efforts by the United Nations to provide humanitarian assistance to children in Ukraine be prioritized by all parties to conflict, in order to facilitate safe, timely and unimpeded humanitarian access to children in these areas.

325. I am concerned by the detention of children, and I urge all parties to ensure that children are detained as a last resort and for the shortest period of time, and to cease all forms of ill-treatment.

326. I am troubled by reports, some of which were verified by the United Nations, of children transferred to the Russian Federation from areas of Ukraine that, in part, are or have been under the temporary military control of the Russian Federation. I urge the Russian Federation to ensure that no changes are made to the personal status of Ukrainian children, including their nationality. I further urge all parties to ensure that the best interests of all children are upheld, including by facilitating family tracing and reunification of unaccompanied and/or separated children who find themselves across borders or lines of control without their families or guardians. I urge parties to the conflict to give child protection actors access to these children to facilitate family reunification and I request my Special Representative to assess with United Nations entities and partners ways to facilitate such processes.

IV. Recommendations

327. I remain concerned by the scale and severity of grave violations against children. I urgently call upon all parties to comply with their obligations under international humanitarian law, international human rights law and international refugee law and to immediately end and prevent grave violations.

328. I welcome the continued engagement by parties to conflict with the United Nations to develop and implement action plans and other commitments to protect children. I reiterate my call upon Member States to continue to support this engagement, including by facilitating United Nations engagement with non-State actors. I request my Special Representative and the country task forces and equivalent arrangements to engage with all parties to end and prevent grave violations, including through engagement with regional organizations, and to strengthen the monitoring and reporting on children and armed conflict in coordination with United Nations system entities.

329. I call upon the Security Council to ensure that child protection provisions and capacity are included in all relevant mandates of United Nations peacekeeping operations and special political missions in line with the 2017 policy on child protection in United Nations peace operations and ensure child protection data and capacity are preserved and transferred during mission transitions and reconfigurations. I underline the importance of mainstreaming child protection concerns in the nexus between early warning, conflict analysis, mediation, transitional justice and disarmament, demobilization and reintegration.

330. I call upon Member States to become parties to the Optional Protocol to the Convention on the Rights of the Child on the involvement of children in armed conflict, if they have not yet done so. I urge Member States and parties to conflict to consider every human being below the age of 18 years as a child in line with article 1 of the Convention on the Rights of the Child. I call upon Member States to endorse and implement the Paris Principles, the Safe Schools Declaration and the Vancouver Principles.

331. I call for the adoption and implementation of legislation that criminalizes violations of relevant rules of international law, including grave violations pertaining to the protection of children in armed conflict, and encourage Member States to adopt national accountability measures and to cooperate with international accountability mechanisms. I call for the inclusion of accountability provisions in action plans signed between the United Nations and parties listed in the annexes to the present report.

332. I am deeply concerned by the numbers of children deprived of liberty, many arbitrarily, and by their ill-treatment. I reiterate that detention should be used only as a last resort and for the shortest period of time, that alternatives to detention should be prioritized and that children should be treated exclusively within child justice systems, that children should never be detained or prosecuted solely for their or their parents' actual or alleged association with armed groups. I urge Member States to treat children actually or allegedly associated with armed forces or groups, including those designated as terrorist groups by the United Nations, primarily as victims, to prioritize their best interest, and to give child protection actors access to them. I encourage Member States to adopt and implement handover protocols for children encountered or detained during military operations to civilian child protection actors and to provide them with reintegration support.

333. I call upon Member States, in line with the principle of non-refoulement, to take measures for the release, protection, repatriation and reintegration of children with

alleged links to Da'esh who are held in camps and places of detention in Iraq and the Syrian Arab Republic, in line with international law and Security Council resolutions. I am concerned about the impact of counter-terrorism measures on children, and I call upon Member States to ensure their consistency with the Convention on the Rights of the Child and other relevant international instruments.

334. I call upon all parties to allow and facilitate safe, timely and unimpeded humanitarian access, as well as access by children to services, assistance and protection, and to ensure the safety and security of humanitarian personnel and assets. I underline that civilians and civilian infrastructure, including hospitals, schools and their personnel, must be protected, in accordance with international humanitarian law. I urge parties to refrain from the military use of schools and hospitals.

335. I urge all parties to undertake clearance of explosive ordnance and provide risk education regarding explosive ordnance and assistance to victims. I urge Member States to become parties to and to implement all conventions on landmines, explosive remnants of war and cluster munitions, if they have not yet done so, and I call upon donors to provide financial and technical assistance.

336. I call upon parties to conflict to refrain from using explosive weapons in populated areas. I encourage Member States to endorse and adhere to the commitments set out in the Political Declaration on Strengthening the Protection of Civilians from the Humanitarian Consequences Arising from the Use of Explosive Weapons in Populated Areas, including the commitments pertaining to avoiding civilian harm.

337. I call upon the donor community to provide long-term financial support for sustainable, timely, gender- and age-sensitive, survivor-centred, and inclusive programmes, including reintegration for victims of grave violations, and to address the specific needs of children with disabilities. I encourage donors to provide funding for monitoring and reporting on grave violations against children and for strengthening child protection capacities on the ground.

338. I encourage Member States and regional and subregional organizations to engage with the United Nations to improve analysis, develop strategies to prevent grave violations, and foster partnerships.

V. Lists contained in the annexes to the present report

339. In Burkina Faso, Islamic State in the Greater Sahara has been listed under section A of annex II for the killing and maiming of children. In the Democratic Republic of the Congo, the Mouvement du 23 mars has been listed under section A of annex I for killing and maiming, rape and other forms of sexual violence, attacks on schools and hospitals and abduction. Mai-Mai Zaïre has been listed under section A of annex I for the killing and maiming of children. Twigwaneho has been listed under section A of annex I for recruitment and use of children.

340. In Ukraine, Russian armed forces and affiliated armed groups have been listed under section B of annex II in consideration of their engagement with my Special Representative for attacks on schools and hospitals and for killing of children, in particular through the use of explosive weapons with a wide-impact area, including shelling from heavy artillery, multiple-launch rocket systems, missiles and air strikes in populated areas. I urge the Russian armed forces and affiliated armed groups to abide by their obligations under international humanitarian law and international human rights law and to urgently finalize and implement their commitments to protect children, including by avoiding the military use of schools and hospitals, putting in place accountability and reparations measures, exchanging information with the

United Nations on all children identified in conflict-affected areas and increasing the provision of access to all children in conflict zones, as well as securing humanitarian corridors as relevant and requested.

341. Furthermore, owing to the high number of children killed and maimed and of attacks on schools and hospitals by Ukrainian armed forces, I urge Ukrainian armed forces to abide by their obligations under international humanitarian law and international human rights law, and to immediately implement measures to protect children and to prevent attacks on schools and hospitals and end their military use, as well as prevent the use of children for intelligence-gathering. I will be particularly attentive to this situation in the preparation of my next report.

342. The following parties were previously listed and have had additional violations added to their listing. In Burkina Faso, because of an increase of attacks on schools and hospitals, Jama'a Nusrat ul-Islam wa al-Muslimin has been listed under section A of annex II for this violation. In the Democratic Republic of the Congo, the Allied Democratic Forces have been listed under section A of annex I for rape and other forms of sexual violence. The Coopérative pour le développement du Congo (CODECO) has been listed under section A of annex I for the abduction of children. In Myanmar, the Myanmar armed forces (see the change in terminology in para. 347 below) have been listed under section A of annex I for attacks on schools and hospitals and abduction, following an increase in these violations.

343. Other modifications to the list have resulted from changes in the landscape of armed conflict in the respective situations or from changes in measures taken by parties to protect children. In Yemen, the Security Belt Forces have been listed in section B of annex I in recognition of their continued participation in activities organized under the 2018 road map adopted to expedite the 2014 action plan signed with the Government of Yemen.

344. In Iraq, the Popular Mobilization Forces have been delisted for the violation of recruitment and use of children owing to a decrease in this grave violation attributed to them, and the signature of an action plan to prevent the recruitment and use of children. The delisting is conditional upon the finalization of all pending action plan activities and the continued absence of recruitment and use of children by the Popular Mobilization Forces. A continued United Nations monitoring and engagement period of 12 months will ensure the sustainability of all existing measures, as verified by the United Nations, and continued engagement with my Special Representative and the United Nations. Any failure in this regard would result in a relisting for the same violation in my next report.

345. In Myanmar, the Myanmar armed forces (see the change in terminology in para. 347 below) remain listed under section B of annex I for the recruitment and use of children. I remain concerned by the levels of recruitment and use in 2022, notwithstanding the signature of a joint action plan in 2012 with the United Nations. I urge the Myanmar armed forces to reverse this negative trend, to strengthen its engagement with the United Nations and to implement the provisions of its joint action plan. Any failure in this regard would result in being listed in section A of annex I in my next report for the recruitment and use of children.

346. In Somalia, the Somali Federal Defence Forces and the Somali Police Force remain listed under section B of annex I. I remain concerned by the levels of recruitment and use, killing and maiming, and rape and other forms sexual violence in 2022, notwithstanding the signature of action plans in 2012 with the United Nations. I urge the Somali Federal Defence Forces and the Somali Police Force to reverse this negative trend, to strengthen their engagement with the United Nations and to implement the provisions of their joint action plans. I urge the Government to strengthen and expedite the implementation of its commitments to combating

conflict-related sexual violence. Any failure in this regard would result in being listed in section A of annex I.

347. Modifications to terminology and to names of parties resulting from changes on the ground are aimed at reflecting the names of parties more accurately. In Afghanistan, Hizb-i Islami of Gulbuddin Hekmatyar has been listed as Hizb-i Islami Gulbuddin, and Islamic State in Iraq and the Levant-Khorasan Province has been listed as Islamic State in Iraq and the Levant-Khorasan to align with other United Nations reporting. In Mali, Ansar Eddine, as part of Jama'a Nusrat ul-Islam wa al-Muslimin (JNIM), has been listed as Jama'a Nusrat ul-Islam wa al-Muslimin, including Ansar Eddine to reflect the fact that JNIM regroups various factions aligned with Al-Qaida. In Myanmar, the Tatmadaw Kyi, including integrated border guard forces, has been listed as the Myanmar armed forces, which is understood to include the integrated border guard forces, to align with other United Nations reporting. In Nigeria and the Lake Chad basin, Boko Haram-affiliated and splinter groups, including Jama'atu Ahlis Sunna Lidda'awati Wal-Jihad and Islamic State West Africa Province, has been listed separately as Jama'atu Ahlis Sunna Lidda'awati Wal-Jihad and as Islamic State West Africa Province to reflect more adequately the configuration of the armed groups. In South Sudan, the South Sudan People's Defence Forces, including the Taban Deng-allied South Sudan People's Defence Forces, has been listed as the South Sudan People's Defence Forces following the integration of the Taban Deng-allied South Sudan People's Defence Forces into the South Sudan People's Defence Forces and their ceasing to independently engage in armed conflict. In Yemen, the Security Belt Forces has been listed under State actors following the formation of the Presidential Leadership Council.

348. In my previous report ([A/76/871-S/2022/493](#), para. 250), I welcomed the engagement of the Government of India with my Special Representative and noted that that engagement may lead to the removal of India as a situation of concern. I note the technical mission of the Office of my Special Representative in July 2022 to identify areas of cooperation for child protection, and the workshop on strengthening child protection, held in Jammu and Kashmir in November 2022 by the Government, with the participation of the United Nations. I call upon India to implement the remaining measures identified in consultation with my Special Representative and the United Nations, including the training of armed and security forces on child protection, the prohibition of the use of lethal and non-lethal force on children, including by ending the use of pellet guns, ensuring that children are detained as a last resort and for the shortest appropriate period of time, and to prevent all forms of ill-treatment in detention, and the full implementation of the Juvenile Justice (Care and Protection of Children) Act and the Protection of Children from Sexual Offences Act. In view of the measures taken by the Government to better protect children, India has been removed from the report in 2023.

349. In view of the gravity and number of violations reported and, where possible, verified in Haiti between September 2022 and March 2023 (recruitment and use, killing and maiming, rape and other forms of sexual violence, attacks on schools and hospitals, abduction, and denial of humanitarian access), this situation will be added as a situation of concern with immediate effect and will be included in my next report.

350. In view of the gravity and number of violations perpetrated by armed groups that were reported and, where possible, verified in the Niger between January and December 2022 in the context of the enhanced monitoring in the Central Sahel region that I requested in paragraph 301 of my previous report (recruitment and use, killing and maiming, attacks on schools and hospitals, abduction, and denial of humanitarian access), this situation will be added as a situation of concern with immediate effect and will be included in my next report.
