This is a document reporting on the severity of the protection impacts on the civilian population as a result of ongoing conflict in Sudan. Clashes between the Sudanese Armed Forces (SAF) and Rapid Support Forces (RSF) erupted on 15 April 2023 and are now in their twentieth week.

Deaths and Injuries:

- On 23 August, the Armed Conflict Location and Event Data (ACLED) project reported that at least 5,000 people have been killed due to the conflict. Actual figures may be higher with communications challenges and ongoing violence inhibiting systematic reporting.
- Since the fighting started, 19 humanitarian workers have been killed and many others have been injured. In addition, according to WHO, 11 health workers have been killed and 38 injured.
- On 29 August, the Ministry of Higher Education stated that 104 higher education institutions have been damaged or destroyed due to the conflict, including laboratories, libraries, lecture halls and administrative offices.

Impact on Civilians:

- In Khartoum, clashes between SAF and RSF continued to intensify during the reporting period. Of the estimated 2,766,600 people displaced from Khartoum, approximately 40,800 IDPs have sought refuge in other locations across Khartoum state while 2,725,800 have fled to other states across Sudan.

Restrictive visa processes continue to inhibit cross-border movement to Egypt for those IDPs intending onward travel.

IDPs are reported to be sheltering across Al Wihda, As Salam, As Sunta, Beliel, Buram, Kas, Mershing, Nitega, Nyala Janoub, Rehaid Albirdi, Sharg Aj Jabal, and Tulus localities.
