Promotion and protection of the rights of children

Children and armed conflict

Report of the Secretary-General

I. Introduction

1. The present report, prepared following consultations and covering the period from January to December 2024, is submitted pursuant to Security Council resolution [2427 \(2018\)](#). The report includes trends regarding the impact of armed conflict on children and information on violations committed, as requested by the Council in its resolution [1612 \(2005\)](#) and subsequent resolutions.¹ Where possible, violations are attributed to parties to conflict and the annexes to the present report include a list of parties engaging in violations against children, namely the recruitment and use of children, the killing and maiming of children, rape and other forms of sexual violence perpetrated against children, attacks on schools, hospitals and protected persons in relation to schools and/or hospitals,² and the abduction of children.

2. The information contained in the present report was vetted for accuracy by the United Nations. Where information is not verified, it is qualified as such. Where incidents were committed earlier but verified only in 2024, that information is qualified as relating to an incident that was verified at a later date.

3. The information does not represent the full scale of violations against children but provides United Nations-verified trends in grave violations against children, given that access for monitors to affected areas and for victims to specialized service

² For the purposes of the present report, the phrase “protected persons in relation to schools and/or hospitals”, used in Security Council resolutions [1998 \(2011\)](#), [2143 \(2014\)](#) and [2427 \(2018\)](#), as well as in the statements by the President of the Security Council of 17 June 2013 ([S/PRST/2013/8](#)) and 31 October 2017 ([S/PRST/2017/21](#)), refers to teachers, doctors, other educational personnel, students and patients.

provision, as well as the decrease in funding for child protection, are ongoing challenges. Attacks against community and civic leaders, on human rights defenders and on monitors of violations against children are concerning and threaten monitoring capacity.

4. Pursuant to Security Council resolution [1612 \(2005\)](#), my Special Representative for Children and Armed Conflict adopted a pragmatic approach to promote broad and effective protection for children. Reference to a situation does not seek to make any legal determination as to whether situations which are referred to in the present report constitute armed conflicts within the context of the Geneva Conventions and the Additional Protocols thereto, nor does it prejudge the legal status of the non-State parties involved in these situations. Accordingly, the report documents situations in which apparent violations of international norms and standards are of such gravity as to warrant international concern, given their impact on children. My Special Representative brings these situations to the attention of Governments, which bear the primary responsibility for protecting children, in order to encourage them to take remedial measures.

II. Situation of children and armed conflict

A. Overview of trends and patterns

5. In 2024, violence against children in armed conflict reached unprecedented levels, with a staggering 25 per cent surge in the number of grave violations in comparison with 2023. Children bore the brunt of relentless hostilities and indiscriminate attacks, and were affected by the disregard for ceasefires and peace agreements and by deepening humanitarian crises. The United Nations verified 41,370 grave violations, of which 36,221 were committed in 2024 and 5,149 were committed earlier but verified in 2024. Violations affected 22,495 children in 2024 (14,383 boys, 7,320 girls, 792 sex unknown). While non-State armed groups were responsible for almost 50 per cent of grave violations, government forces were the main perpetrator of the killing and maiming of children, attacks on schools and hospitals, and the denial of humanitarian access.³ The sharp rise in the number of children subjected to multiple violations from 2,684 in 2023 to 3,137 in 2024, through the convergence of abduction, recruitment and sexual violence, represented an alarming escalation in brutality. Some 16,482 children formerly associated with armed forces or groups received protection or reintegration support during 2024.

6. State actors and non-State armed groups showed a persistent and blatant pattern of grave violations and lack of respect of the special protections afforded to children, compounded by the use of private security companies. Warfare strategies included attacks on children, the deployment of increasingly destructive weapons, the use of explosive weapons in populated areas and the systematic exploitation of children for combat. Deliberate harm was inflicted on children, instilling terror, affecting their psychological health and driving mass and prolonged displacement. The urbanization of conflicts and their intensification across borders, the climate emergency and regional insecurity increased the vulnerabilities of children. State and non-State armed actors continued to commit grave violations with impunity.

³ Information related to the denial of humanitarian access to children is presented pursuant to Security Council resolution [1612 \(2005\)](#) and follows guidelines of the monitoring and reporting mechanism on children and armed conflict. The information presented herein does not reflect the full humanitarian access situation in the countries concerned.

7. The violations verified in the greatest numbers were the killing (4,676) and maiming (7,291) of 11,967 children, the denial of humanitarian access (7,906 incidents), the recruitment and use of children (7,402) and the abduction of children (4,573). The number of children detained for actual or alleged association with armed groups including those which are currently under sanctions enacted by the Security Council, or for national security reasons, surged to 3,018, further depriving children of their rights. The highest numbers of grave violations were verified in Israel and the Occupied Palestinian Territory (8,554), the Democratic Republic of the Congo (4,043), Somalia (2,568), Nigeria (2,436) and Haiti (2,269). The sharpest percentage increases in the number of violations were verified in Lebanon (545%), Mozambique (525%), Haiti (490%), Ethiopia (235%) and Ukraine (105%).

8. Children were killed and maimed, often resulting in life-long disabilities, in appalling numbers by the use of explosive ordnance, including explosive remnants of war, mines and improvised explosive devices, and by crossfire between parties to conflict. Attacks on civilian objects, including schools and hospitals, dramatically increased the vulnerability of children.

9. The number of cases of sexual violence increased by 35 per cent, including a dramatic increase in the number of cases of gang rape, which underlines the systematic use of sexual violence as a deliberate tactic of warfare while children were associated with parties to conflict or to enhance territorial control, displace populations and attack the specific ethnicity or gender of children, among other objectives. Girls were abducted for the purposes of recruitment and use, and for sexual slavery. Sexual violence continues to be vastly underreported owing to stigmatization, the fear of reprisals, harmful social norms, the absence of, or lack of access to, services, impunity and safety concerns, as reported in my report on conflict-related sexual violence (SYMBOL).

10. The denial of humanitarian access has reached an alarming scale, with more humanitarian workers, including United Nations personnel, killed in 2024 than ever before. Parties to conflict attacked aid convoys and personnel, arbitrarily detained humanitarian personnel, restricted humanitarian activities and movements, adopted bureaucratic and administrative barriers and interfered with humanitarian operations, resulting in children being left without access to healthcare, education, protection and life-saving necessities.

B. Challenges and the way forward

11. The drawdown of United Nations peacekeeping operations and special political missions combined with the global decrease in funding for child protection negatively affected child protection by significantly reducing United Nations capacity to verify and respond to grave violations. Despite this capacity decrease, the United Nations was still able to verify the shocking increase in the number of grave violations. System-wide solutions and sustainable funding streams are urgently required to ensure the mainstreaming of the children and armed conflict mandate in the development, human rights, peace and security work of the Organization.

12. Reinforced funding for and commitments to upholding child rights and protection should be prioritized at a time of unprecedented vulnerabilities of children. Any further reduction in resources will strain operations, limit protection capacities and reduce life-saving assistance, thus having a devastating impact on conflict-affected children.

III. Information on grave violations
